EDUCATION

Diploma (IT)
Bhagwan Mahavir Polytechnic

INTERNSHIP

Web Developer

OceanMtech infotech PL
21-Aug -2023 - Current

PROJECT

•

•

bank management system

- I successfully developed a comprehensive Bank Admin Panel leveraging React.js for the frontend framework, Tailwind CSS for responsive and elegant styling, and Redux with Redux Toolkit for state management. The panel is integrated with APIs to enable seamless communication with the backend, providing features such as user management, transaction tracking, and data visualization.
- The project focuses on a clean, intuitive design and robust functionality to streamline administrative tasks, ensuring a secure and efficient user experience
